Lecture 5: Self-Control	171
Lecture 6: The Fatherhood of God - Part One	179
Lecture 7: The Fatherhood of God - Part Two	187

Introduction

This book is about victory in the most subtle of the battlefields. Satan's onslaught in the age in which we live is predominantly directed against the minds of God's people. If he can succeed in blocking Christian growth, and seeing the Church full of 'Baby' immature believers, then he's won a major part of the battle.

We need, urgently, to come to terms with a profound truth that has been in Scripture all the time, but hardly practised in the lives of believers. That is, "it's in the mind". Secular human sciences totally support what Scripture has said all along.

Too many churches have people in the pews who are still 'babes' in Christ. They haven't made any definitive decision, apart from being born again, to move closer to Jesus and to let His character grow in them. What a pity, because they're missing out on an abundant blessing life, and, worse still, they're holding the church back.

Remember that the new birth takes place instantly, but progressive education, retraining and reprogramming of the mind can only be done by the Word of God. Furthermore these things take time, effort and a decision of the will. They don't just happen automatically.

This book will help you to recognise where you are in your Christian Character development. You could be anywhere between babyhood and maturity. Furthermore, it will provide you with the understanding that you need to encourage others to grow to maturity in Christ, and be renewed in their minds.

Please note that Christian Character only develops as we become more like Jesus, and exult in our lives the Fruit of the Spirit.

As a Leader, it should be your desire that the minds of believers be renewed (reprogrammed) by the Word of God. There is not other way to maturity.
